FOR IMMEDIATE RELEASE

LOCAL ENTREPRENEUR ATTENDS SHAKLEE CORPORATION'S GLOBAL CONFERENCE IN NEW ORLEANS

Conference Unveils Vivix™ Cellular Anti-Aging Tonic* Dietary Supplement

NEW ORLEANS, Louisiana. August, 2008 – Bob & Edie Gentile of Jupiter, FL, recently joined thousands of social marketing entrepreneurs from the U.S. and around the world at the Shaklee Global Conference in New Orleans, Louisiana, August 6-10. Shaklee, the number one natural nutrition company in the U.S., holds its Global Conference annually to recognize and congratulate members of the Shaklee family for their successes and achievements.

This year, developed after years of research, Shaklee unveiled Vivix Cellular Anti-aging Tonic, a revolutionary breakthrough dietary supplement in the fight against cellular aging. In laboratory studies, Vivix ingredients have been shown to impact the four key mechanisms of cellular aging: DNA damage, genetic regulators, declining cellular energy production and the formation of Advanced Glycation Endproducts (AGE) proteins. Vivix ingredients help protect and repair cellular DNA and positively impact genetic regulators which help turn down cellular aging. The ingredients in Vivix also promote mitochondrial biogenesis, helping to increase mitochondrial efficiency in our cells to create energy, and are ten times more powerful than resveratrol alone at slowing AGE protein formation which can cause cellular damage that can compromise cell integrity and longevity.*

“We are proud to introduce the world’s best anti-aging supplement,” said Dr. Jamie McManus M.D., Chairman of Medical Affairs, Health Sciences and Education, Shaklee Corporation. A 30-day supply of Vivix delivers the equivalent amount of resveratrol found in 3,000 glasses of red wine, and Vivix ingredients have been shown in laboratory studies to be 10 times more powerful in slowing a key mechanism of aging than resveratrol alone.”*

Exclusive to Shaklee, Vivix is all-natural and formulated with clinically tested key ingredients. Shaklee has worked for years to isolate a unique profile of polyphenols that have been shown in laboratory studies to fight cellular aging, and has filed for multiple patents to protect this innovation.* Just one of the ingredients in Vivix has been referenced in more than 2,000 research publications. Vivix ingredients also support heart health, brain health and cardiovascular function, enhanced immunity, and joint health.*
