

SAFE FOR YOU, YOUR HOME, AND YOUR PLANET.™

CELEBRATE EARTH DAY WITH THE BEST GREEN CLEANERS

SHARE SHAKLEE WITH FRIENDS FOR A HEALTHIER HOME AND PLANET

Get Clean® has been seen by close to **150 million people**, and has been recommended by cultural giants like **Oprah** and **Rachael Ray**, as well as best-selling authors from **David Bach** to **Colin Cowie**. You may have seen us in hundreds of places including magazines such as **Better Homes & Gardens**, **TIME**, **Real Simple**, **Family Circle** and **FAST COMPANY** or on news programs like "TODAY", "CBS 2 Chicago" and "KTLA FOX Los Angeles." In fact, according to Nielsen Buzzmetrics, **Shaklee** is one of the **most popular brands** currently discussed in connection with sustainability!

WHAT A DIFFERENCE YOU'VE MADE!

Just through the sale of **Basic H²**™ alone, we've eliminated **3 billion bottles** of conventional 26-ounce window cleaner -- if placed end-to-end, these bottles would wrap around the earth more than 19 times!*

Time Magazine says Oprah had this to say about Basic H² (11/20/07)

"I really love the **Basic H² Organic Cleanser Super Cleaning Concentrate**. And the reason why I love the H² is because you just use a drop, just a little drop and it cleans like what you would normally be using a half a bottle of stuff for. So it sounds expensive, but it's concentrated and saves the environment."

Rachael Ray: Lara Spencer's "The Dish" (3/28/08)

"These products are called **Get Clean** and the reason why we love them is because they provide the best combination of really great cleaning power but also they're non-toxic, they are economic, and they are safe for you, your home, and most importantly, the planet...so we just ask that you consider giving Shaklee a try – for me, for Rach."

New York Times Magazine (3/16/08)

"So Shaklee's eco-friendly **Scour Off Heavy-Duty Paste** is tempting: it promises to disappear oven drippings and not 'burn off your nose hairs in the process.' That works for me."

InStyle (March 2008)

"They can't leap buildings in a single bound, but these non-toxic Shaklee products are super-powerful when it comes to fighting grime."

Domino (March 2008)

"Shaklee did the best job (by far) on our stain test. It uses enzymes, not phosphates or solvents, to power out grime, and the formula is so concentrated, it replaces three bottles of mere mortal varieties."
